

## **Mammoth Rock Farm/Bill Chadwick Recommendation**

Bill Chadwick, from Mammoth Rock Farm, did a fantastic job helping us restore our property to a working family farm. Bill was very professional and thorough and I would highly recommend the types of services he can perform for you. One of our major goals over the years had been to restore the fields on our property that had not been farmed since the 1970's by my grandfather, my father and my uncles. Since then all the fields had become overgrown with trees, vines, and other brush and trying to maintain them had become almost impossible. I contacted Bill and he came out and we did a complete walk-through of the property and he came up with a game plan on how best to clear the fields and create better access for us into the remaining wooded area on our property. Bill gave us an accurate estimate of what the job would cost and the time it would take to complete the project. Throughout the project Bill would review where we were with the budget and the timetable. Upon completion, Bill was able to clear the main field and plant it with hay, as well as open up access for us to the other fields and surrounding woods. He was able to keep to the budget and the timetable we had established, as well as provide us with helpful tips as we move forward with our plans to restore our property back to the working family farm it had once been. Bill also worked with us to develop a Forestry and Agricultural Tax Abatement Plan for the property, which will help us acquire a local property tax reduction. Overall I would give Bill the highest rating possible for the work, effort, knowledge and experience he gave us during the time he spent working with us to turn back the clock on our property to the 1970's and make it the working family farm it once was.
